

Key Vocabulary:

Season: a season is one of the four divisions of the year. (Spring, Summer, Autumn, Winter) marked by different weather patterns and the amount of day light hours.

Spring: The season, after winter, when the temperature begins to rise, plants begin to grow and animals come out from hibernation.

Summer: The warmest season, coming after spring, when the days are long because the sun rises earlier and sets later

Autumn: The season, after summer, where the days get shorter, crops can be harvested and the leaves begin to fall from the trees

Winter: The coolest season, trees are often bare and some animals hibernate.

Weather: The state of the atmosphere at a particular place and time as regards heat, cloudiness, dryness, sunshine, wind, rain, etc

Clouds: A cloud is a collection of tiny droplets of water in the sky, when the droplets fall they become rain

Flood: An overflow of water

Hurricane: A powerful storm with strong winds

Learning Objectives

- To identify what type of weather we have in the UK.
- To discover how the seasons are linked to particular months of the year
- To compare and contrast the weather in the four seasons.
- To understand what a weather forecast is and what it tells us about the weather
